About Us

Established in 2012

Flexico Packaging JMA was founded to meet growing demand for packaging products across the Middle East. Today, we supply specialised materials to food businesses, printers and cosmetics companies across regional markets.

Our range brings together flexible films, labels, aluminium foils, papers and industrial packaging materials, supported by a professional approach to each customer's requirements.

Packaging Films

BOPP FILM

Biaxially oriented polypropylene films for confectionery, cosmetics, liquids and consumer goods. Select a grade to suit the packaging or lamination application.

RANGE & OPTIONS

- Transparent non-sealable / heat-sealable
- White label grade / white opaque
- Wet lamination
- Metallized heat-sealable
- Matte
- Thermal lamination: gloss / matte

Coated BOPP Film

Specialised films for demanding lines

Coated BOPP options for specialised packaging. Acrylic-coated film supports high-speed packaging while helping retain product aroma and freshness.

| Acrylic Coated Film
| PVDC Coated Film

PET Film
Polyester Film

Clarity meets printing performance

Polyester Film is an excellent film for economical printing with excellent optics and packaging results. PET Film can be used for lamination with many other films such as CPP Film, and BOPP Film.

- **PET Transparent Film**
- **PET Metalized Film**
- **PET Electrical Grade Film** (Cable Insulation)
- **PET Matte Film**
- **PET Twistable Film**

CPP Films Metallized and Transparent

Cast Poly Propylene Film is the optimum choice for packaging of food itmes such as Pasta, Chips, and biscuits. CPP Film is an economical and viable choice for food packaging.

Gift Packaging Film

We have a range of packaging films for gift packaging.

- | Flower Bouquet Packing Film
- | Gift Trays Packing Film
- | Sweets Trays Packing Film
- | Shrink Film

POF Shrink Films
Polyolefin Films

POF (polyolefin) shrink film is a clear, high-strength thermoplastic wrapping material made from polypropylene and polyethylene.

Key Characteristics

• **Visual Appeal:** Offers exceptional crystal clarity, high gloss, and low haze to make packaged items look sharp on retail shelves.

• **Durability:** Features strong puncture and tear resistance, ensuring secure protection against dust, moisture, and rough handling.

• **Eco-Safe Profile:** Contains no chlorine or harmful plasticizers, releases no foul odors or toxic smoke when heat-sealed, and is fully recyclable.

• **FDA Compliance:** Meets strict regulatory standards for direct food contact, making it safe for edibles

Common Uses

• **Food & Beverage:** Bundling fresh produce, frozen meals, bakery items, and multipacks.

• **Consumer Goods:** Wrapping toys, cosmetics, stationery, electronics, and pharmaceutical boxes.

• We have a range of POF Films for all kinds of packaging applications. We have cross linked, center folded, and single layer POF

Specialty
Packaging Films

Window Patching Film

Super-clear films for cosmetic, food, and consumer-goods boxes. Available in 50–125 micron and custom sizes.

Cling Film

High-quality cling film in multiple sizes and thicknesses for retail and food packaging. Ready stock with quick delivery.

Paint Protection Film – PPF

Protective films for automotive, retail, and consumer applications. Available in various sizes and thicknesses.

Candy Packaging Films – Twist Grades

Specialized twist-grade films for attractive and secure confectionery packaging.

Barrier Films.

Barrier films are specialized, protective materials designed to block the permeation of liquids, gases, vapors, or light. They act as a protective shield and are designed to give a longer life to items that can be affected by contamination. We have a range of microns and sizes in stock for immediate deliveries.

Premium Velvet Lamination Films

Specialty soft-touch velvet lamination films designed for premium and luxury packaging applications.

In Mould Labels – IML

PET G Shrink FILM (Add in PET FILM)

PVC SHRINK SLEEVES

Capacitor Films

Vacuum Bags:

Vacuum bags for food packaging are specialized, multi-layer plastic pouches designed to have all air (oxygen) removed from the interior before being heat-sealed airtight.

Main Benefits

Extended Shelf Life:
Slows down oxidation, mold growth, and aerobic bacteria, keeping food fresh 3 to 5 .times longer than normal storage

Freezer Burn Protection:
Shields frozen meats, fish, and vegetables from dry air exposure.

Lidding Films

Lidding films are flexible top-seal webs used to cover and seal plastic cups, trays, bowls, and rigid or semi-rigid containers across the food, medical, and consumer packaging industries.

Industrial Packaging

Industrial Packaging is essential for all sectors. With basic shrink films and stretch films, you can meet your daily packaging needs. From Pallet wrapping to promotional packaging, FP has a wide range of products available.

- POF Shrink Film
- PVC Shrink Film
- Adhesive Tape
- Industrial Gloves
- Pallet Strapping
- Stretch Film Hand Roles – Pallet Wrapping
- Stretch Film Machine Roles – Palllet Wrapping

Zipper Liners for Pouches

Reliable zipper solutions for food, beverage, and consumer-goods pouch packaging.

Packaging Papers

Chocolate Paper

Premium packaging paper designed to protect chocolate from moisture, light, and external exposure while providing an attractive surface for branding. Available in multiple colors and sizes.

Greaseproof Paper

For excellent barrier properties and preventions of leaks; OGR and Greaseproof paper is an excellent printable paper for all food packaging needs. Many different grades are available.

Kraft Paper – Bleached / Unbleached

Versatile food packaging paper available from 23 GSM to 120 GSM, suitable for sandwich wraps, sheets, takeaway packaging, and durable food-service bags.

Baking Paper

High-quality, double-sided siliconized baking paper designed for high-temperature industrial use. Available in roll and sheet form and suitable for repeated baking applications.

Specialty Papers

For sugar and other sachet packaging, we have high quality One Side Coated Paper (Sugar Paper) available. Our paper has an excellent treatment which gives an overall glossy look and can be printed on. We have a range of sizes available.

We have a range of papers that are used in specialized applications of food packaging such as

- Honeycomb Foil Paper
- Wax Paper
- Aluminum Paper
- Butter Paper
- Siliconized Paper
- Baking Paper
- Machine Glazed Paper
- Kraft Paper
- Greaseproof Paper
- Sugar Paper

Self Adhesive Label Stock

With the growing Self Adhesive Label market, we have a range of products that can be used to print all kinds of labels. Self Adhesive Label paper can be used to print labels for retail goods, barcodes, lubricants, and the pharmaceutical industries. With the right label paper, you can get the highest quality label for the most economical value. We are also providing security labels and specialized gold and silver labels.

- Semi Gloss Label Paper
- Direct Thermal Label
- Thermal Transfer Label
- Valleum Paper
- Matt Paper
- PP White
- PP Clear
- PE Transparent

Packaging Foils

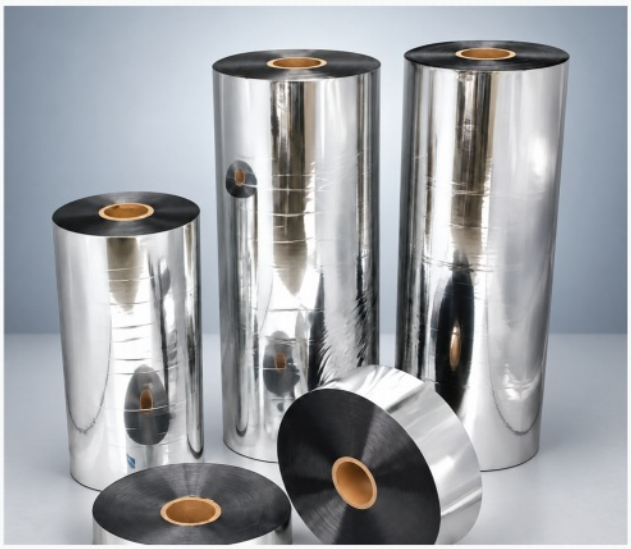
Aluminum Foil

Aluminium foil for flexible packaging is offered in a selection of thicknesses to meet different converting requirements.

Cold Foil

For Self Adhesive Label applications, we have high quality Cold Foils which enhance the appearance of the Self Adhesive Label product. We can provide all sizes on demand and we have a wide range of varieties available. We have the following colors available

| Dark Gold | Silver
| Gold | Rainbow



Pharmaceutical
Packaging Materials

Blister Foil

High-barrier aluminum foil used in pharmaceutical, food, and commercial packaging. Protects products from moisture, oxygen, and light. Available in various microns and thicknesses.

Pharmaceutical Wet Wipes Material

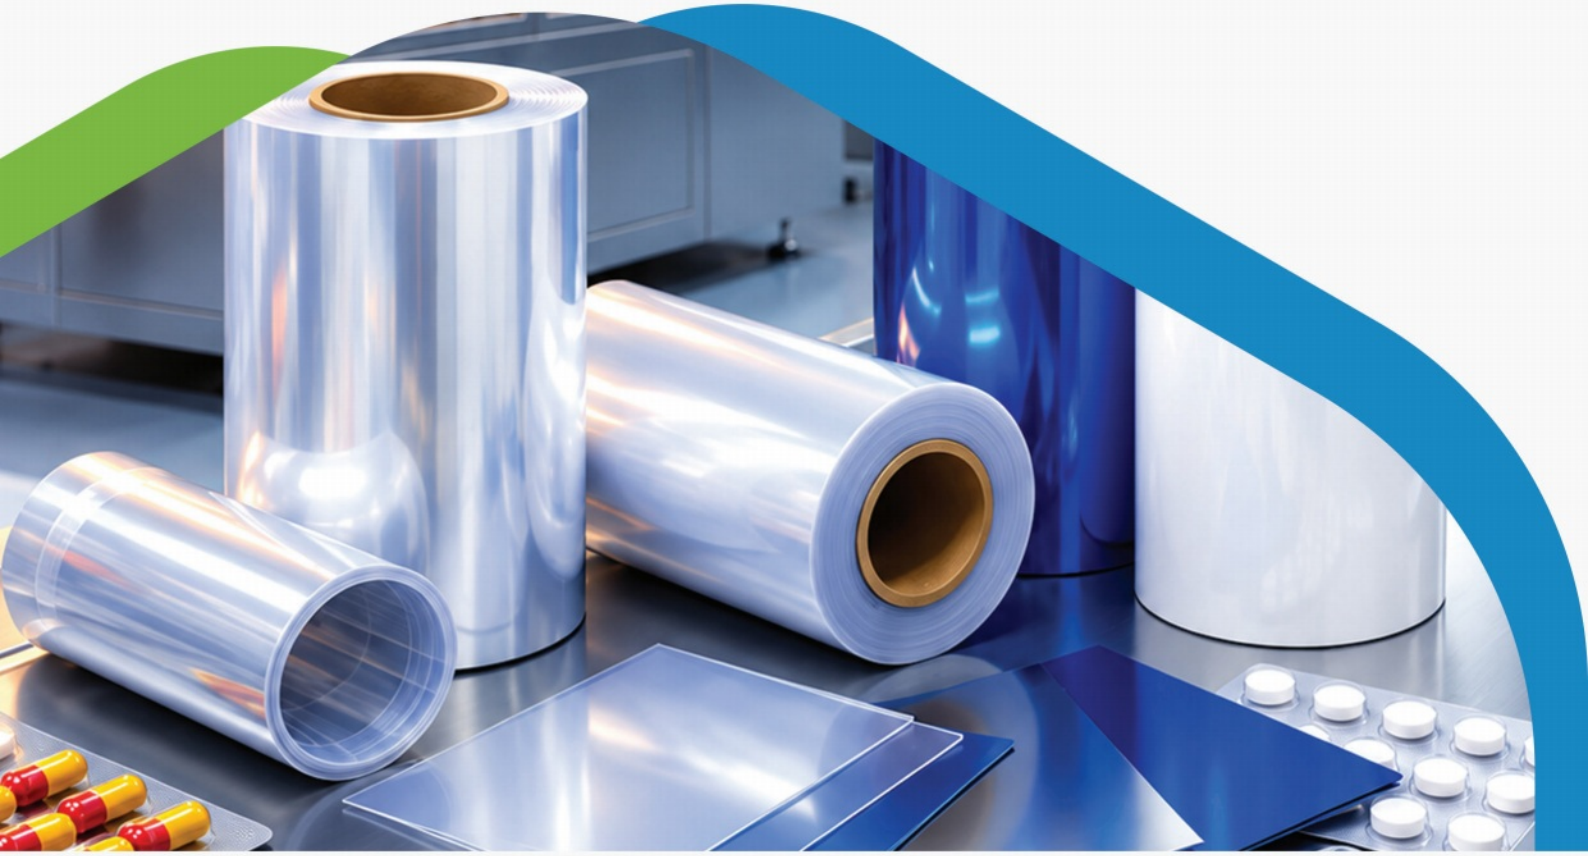
Multi-layer PE / Aluminum Foil / Paper structure designed for wet wipes, alcohol pads, and cosmetic sachets. Provides excellent protection against moisture, air, and light.

Alu Alu Foil

Premium cold-form pharmaceutical packaging offering high barrier protection without PVC. Available in multiple thicknesses and sizes with low MOQ options.

Rigid PVC Film

Thermoformable pharmaceutical film widely used for tablet and capsule blister packs. Offers excellent formability, rigidity, and cost efficiency. Available in different thicknesses and sizes with low MOQs.



Printing Chemicals

Ethyl Acetate

Fast-evaporating solvent for flexographic and gravure inks. Used for resin dissolution, viscosity control, quick drying, and equipment cleaning. Available for urgent and JIT deliveries.

Ethanol

Reliable solvent for flexo and gravure printing, supporting fast drying, stable viscosity, and effective cleaning. Available in multiple grades including 99.9% and 98%

Isopropyl Alcohol (IPA)

High-purity solvent used for offset printing, cleaning, and resin applications.

Packaging That Works
for Your Business

From flexible films and foils to labels, specialty papers, and industrial packaging, Flexico helps you find the right material for .your application
